

Want a custom design for your new home that is non-standard, different or not the same as the other homes in your street?

If you have built a new home before, you will likely want to have a greater control over the design this time. You know what you like and do not like. You know more about what is possible and practical. And you want a design created just for you that matches your dreams.

We understand that. We have created a Custom Home Design Process that gives you the freedom to have full input into your home. It begins with our free home design consultation, where you get to share your ideas, dreams and desires.

As we listen, we learn more and more about what you want. And over the course of the consultation we can dip into thousands of designs and floor plans, pull the parts out that you like and discard the others. In the space of an hour you will achieve more progress on your custom new home plan than you thought possible. More than you have achieved in many weeks of wandering display villages and staring at web page after web page!

You will see progress on our mega screen as your dream home comes to life. And because we know what is both possible and practical, and because we really do specialize in homes that stand out from the crowd (Just check out our awards!) – you will end the session with a big smile.

There is nothing more for you to do until you call us now and set up the consultation that opens the door to your dream home. Call us on 07 4779 4199.

Please enjoy our gallery of custom house designs below – it is a great way to grab those new ideas that make your dream home into YOUR dream home!
